## Category 1: Foundational Governance

### 1. Treat Every Citizen as an Owner

**Standard Definition:** Citizens are the primary Owners of the state. All employees and elected officials are subordinates (Agents) who must treat non-violent Owners with professional respect.

**Operational Functionality & Specifications:** No Owner may be subjected to suppression, threats, unauthorized investigation, or administrative penalties for non-violent questioning, vocalizing criticism, or requesting documentation. Prohibited Agent conduct includes, but is not limited to: detention, abuse, threats with weapons or force, loss of employment, citizenship revocation, removal of children, psychiatric commitment, or placement under guardianship. These obligations apply to all state-related entities (parliament, military, intelligence) and third-party contractors.

**Strategic Justification:** This right resolves the problem of "Ownership Denial". In any professional organization, an Agent cannot deny the Principal's status. This ensures the sensibilities of subordinates (e.g., law enforcement) do not override the Owner's inherent authority to critique the organization.

**Accountable Entity:** All State-Related Organizations.

**Audit Failure Criteria:** Any instance where an Owner is punished, tracked, or ridiculed for expressing a non-violent opinion.

**Remediation Protocols:** Immediate cessation of the violation. Personnel face Type B1 Mandate Nullification (Termination of Employment) and a Type B2 Public Service Exclusion (10-year ban). Administrative action must attach to at least three individuals: the primary actor, their supervisor, and the department head.

**Authorized Initiators & Filing Procedures:** Individual Owners acting for themselves or their children. Refer to Document 40.

## 2. Right to Non-Violent Speech

**Standard Definition:** Owners have the inherent right to express opinions or criticism via verbal, written, or digital channels without Agent interference.

**Operational Functionality & Specifications:** This right covers all digital and paper communication and public demonstrations, whether conducted individually or in groups. Agents (including elected officials) must accept non-violent criticism as a mandatory condition of their employment. Non-violent speech may not be suppressed, monitored, or punished.

**Strategic Justification:** The formulation of divergent views is an essential component of ownership. This right is structurally superior to any organizational "reputation management" or the personal sensibilities of Agents.

**Accountable Entity:** All State-Related Organizations.

**Audit Failure Criteria:** Suppression, threats (e.g., job loss, psychiatric commitment), or investigations against an Owner for speech.

**Remediation Protocols:** Immediate Termination of Employment for Agents or contract termination for subcontractors, followed by a Type B2 10-year exclusion.

**Authorized Initiators & Filing Procedures:** Individual Owners only.

### 3. Open Access to All Laws

**Standard Definition:** Compliance cannot be mandated if the rules are inaccessible. All current and planned laws, decrees, and regulations must be free and digitally available.

**Operational Functionality & Specifications:** Digital access must be searchable, registration-free, provided in unchangeable common formats, and allow for "Data Time Travel" to audit past versions. Physical copies are required in every town exceeding 1,000 inhabitants. Phased deadlines apply: current laws must be available within 1 month; a 5-year history within 6 months; and a 25-year history within 12 months of the first request. Changes must be accessible 90 days in advance (7 days in emergencies).

**Strategic Justification:** Owners can only follow rules they can access. Centralized, free access reduces the cost of compliance for Owners and businesses.

**Accountable Entity:** National Government & Regional Authority.

**Audit Failure Criteria:** Bypassing the 90-day rule or providing non-searchable/restricted data.

**Remediation Protocols:** Postponement of the law's enforcement date. Termination of Employment for responsible Agents and a Type B2 10-year exclusion.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## Category 2: Vital Protections

### 4. Protect Lives from Immediate Threats

**Standard Definition:** The state's primary function is the physical protection of its Owners against disasters, accidents, and pandemics.

**Operational Functionality & Specifications:** Owners may demand evidence of readiness for local natural and industrial disasters, including medical stockpiles, water, food, and functional emergency networks (Police, Ambulance, Hospitals). The state must avoid starting wars on foreign soil that result in casualties.

**Strategic Justification:** Physical survival is the core objective of the state-owner contract. Readiness for rapid-onset threats (e.g., tornadoes or industrial accidents) is a non-negotiable service level.

**Accountable Entity:** National Government & Local Government.

**Audit Failure Criteria:** Negligent or intentional failure to provide readiness or starting unauthorized foreign wars.

**Remediation Protocols:** Termination of Employment. If negligent: 5-year ban; if intentional: lifetime ban.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## 5. Defense Against Systemic State Overreach

**Standard Definition:** An Owner possesses an absolute, non-negotiable right to immediately veto any action by state Organizations or their Agents that threatens Owner groups' life, health, freedom of movement, or assets based on identity, status, or non-violent activity.

### Standardized Indicators of Systemic Misconduct (Persecution Criteria):

- **Demographic Identification:** Targeting based on ethnicity, religion, or sexual orientation (e.g., historical systemic purges or genocides).
- **Socioeconomic Status & Professional Classification:** Persecution directed at specific social groups, including Owners experiencing homelessness or those within specific professional categories.
- **Belief Systems & Political Affiliation:** Retaliation based on an Owner's political views or philosophical convictions.
- **Exercise of Ownership Rights:** Suppression of fundamental non-violent activities, including free speech, public demonstrations, or industrial strikes.

**Operational Functionality & Specifications:** This standard prevents the Organization from utilizing "legal" mechanisms to persecute Owners.

**Strategic Justification:** History demonstrates that legal structures can be subverted to validate the destruction of specific demographics (e.g., 20th-century totalitarianism). This right ensures the Principal's authority remains intact, even if the Agent modifies internal statutes to authorize misconduct.

**Accountable Entity:** Law Enforcement & Security; National Government

### Audit Failure Criteria:

Direct: Murder, execution, unauthorized detention, jailing, kidnapping, placement in camps, torture, or the forcible removal of an Owner's children.

Indirect: Systematic censorship or silencing of information regarding imminent catastrophic events (e.g., industrial or military accidents, pandemics) to hide organizational failure.

**Remediation Protocols:** Immediate cessation of the unauthorized action. Involved personnel—from decision-makers to processors—face mandatory Type B1 Mandate Nullification (Termination of Employment) and a Type B2 Public Service Exclusion (20-year ban). "Following orders" is not a valid defense.

**Authorized Initiators & Filing Procedures:** Individual Owners acting for themselves, their children, or on behalf of Owners who are missing or incapacitated. Refer to Document 40.

## 6. Guaranteed Basic Need

**Standard Definition:** The state must ensure daily survival (water, food, shelter, med-care) and weekly access (energy, communication).

**Operational Functionality & Specifications:** Services must be provided for free if the Owner lacks wealth. Quality must exceed that of refugees or prisoners. Services must be local for 6 months, then within 200 miles of the Owner's address.

**Strategic Justification:** Keeping Owners alive is the fundamental meaning of a country.

**Accountable Entity:** National Government.

**Audit Failure Criteria:** Failure to provide specified volumes (e.g., <1 gallon of drinking water daily) or sabotaging requests.

**Remediation Protocols:** Termination of Employment and a Type B2 4-year exclusion.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## Category 3: Citizenship & Migration Control

### 7. Protection of Citizenship Status

**Standard Definition:** Owners may veto involuntary citizenship withdrawal. Relinquishment must be strictly voluntary and without pressure.

**Operational Functionality & Specifications:** A 1-year notice is required for withdrawal from non-birthright citizens. No Owner can be forced to renounce other citizenships.

**Strategic Justification:** Agents (employees) cannot terminate the status of the Principal (the Owner).

**Accountable Entity:** National Government.

**Audit Failure Criteria:** Any involuntary revocation bypassing these rules.

**Remediation Protocols:** Termination of Employment, Type B2 10-year exclusion, and Type C Financial Restitution (min. 10x average salary).

**Authorized Initiators & Filing Procedures:** Individual Owners.

## 8. Publish All Immigration Statistics

**Standard Definition:** Owners are entitled to regular, audited statistics on immigration, refugees, and new citizenships.

**Operational Functionality & Specifications:** Reports must be monthly, unchangeable, and contain 8 years of historical data. Data must include anonymized geodata (ZIP codes) for entries and address locations, grouped by citizenship, sex, and age. Accuracy must be confirmed by two independent consulting firms.

**Strategic Justification:** Transparency enables Owners to track demographic shifts and articulate informed criticism.

**Accountable Entity:** National Government & Regional Authority.

**Audit Failure Criteria:** Failure in frequency, detail, or quality assurance.

**Remediation Protocols:** Termination of Employment and Type B2 10-year exclusion for repeat offenses.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## 9. Set Voting Rules for New Citizens

**Standard Definition:** Voting rights for citizens acquired after age one may be restricted for 10 years to ensure organizational stability.

**Operational Functionality & Specifications:** Restriction applies to voting and state-related leadership eligibility. Monthly audited reports with ZIP geodata must track the application of this ban.

**Strategic Justification:** Prevents the ruling power from artificially expanding the voter base (e.g., through annexation) to maintain power. This mirrors the 18-year wait for natural-born citizens.

**Accountable Entity:** National Government.

**Audit Failure Criteria:** Failure to apply the restriction or process the request.

**Remediation Protocols:** Termination of Employment and a Type B2 10-year exclusion.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## 10. Voter Approval of Visa Rules

**Standard Definition:** Visa and citizenship conditions must be authorized in advance by a public mandate. Owners may retrospectively veto unauthorized changes.

**Operational Functionality & Specifications:** In the absence of an authorized mandate, new visas or citizenships must be suspended. This protects Owners from economic displacement caused by unauthorized changes.

**Strategic Justification:** Owners must control the terms of membership to ensure their interests are not ignored by management.

**Accountable Entity:** National Government.

**Audit Failure Criteria:** Modifying conditions without a prior public mandate.

**Remediation Protocols:** Termination of Employment and a Type B2 10-year exclusion.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## Category 4: Mandate Authorization

### 11. Voter Approval for Constitution

**Standard Definition:** Constitutional changes must be authorized in advance. Unauthorized changes are null and void.

**Operational Functionality & Specifications:** Changes must be public 270 days in advance. Validation requires a YES vote from 50% of all Owners. Owners may retrospectively nullify any change bypassing these limits.

**Strategic Justification:** The constitution is the cornerstone of all laws and must be stable. This prevents political factions from stripping rights or changing state forms overnight.

**Accountable Entity:** National Government.

**Audit Failure Criteria:** Bypassing the notice period or the 50% threshold.

**Remediation Protocols:** Termination of Employment for the Head of State and senior officials, plus a Type B2 25-year exclusion and a lifelong ban from political office.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## **12. Veto of Programs Outside the Mandate**

**Standard Definition:** Agents may only implement programs defined in their official election mandate.

**Operational Functionality & Specifications:** Election programs must be public 100 days before the vote. Projects exceeding budget by 25% or omitted from the mandate may be halted by any Owner. Quarterly reporting on authorized investments is required.

**Strategic Justification:** Prevents "mission creep" and unauthorized spending. Management is only mandated for what they have explicitly written down.

**Accountable Entity:** All State-Related Organizations.

**Audit Failure Criteria:** Executing unauthorized investments or stopping authorized services.

**Remediation Protocols:** Termination of Employment for the head of the organization or party.

**Authorized Initiators & Filing Procedures:** Individual Owners.

### 13. Enforce High Standards for Voting

**Standard Definition:** Owners may deny vote results that fail strict Quality Assurance (QA).

**Operational Functionality & Specifications:** Requires a nationwide risk-limiting audit ( $\alpha=0.01$ ) by three independent firms per circle. Random sampling of 20% of the most contested circles is required; discrepancies  $>2\%$  trigger a full recount. See technical specs in Doc 32.

**Strategic Justification:** Voting fraud has historically hijacked the will of Owners. Transparent QA is essential to minimize manipulation risks.

**Accountable Entity:** National Government & Local Government.

**Audit Failure Criteria:** Failure to perform the audit or exceeding discrepancy limits.

**Remediation Protocols:** Nullification of results. For sabotage: Termination of Employment and a Type B2 25-year exclusion.

**Authorized Initiators & Filing Procedures:** Single Owner veto nullifies the result.

## Category 5: Executive Accountability

### 14. Limit Terms and Immunity for Leaders

**Standard Definition:** Leadership tenure is limited by cumulative immunity years. Hitting the limit allows Owners to request termination of employment to restore accountability.

#### **Operational Functionality & Specifications:**

The 20-Year Threshold: Owners may request Termination of Employment for any individual holding immunity for 20 weighted years without a continuous 4-year immunity-free break.

Weighted Seniority: Years as President, Minister, or Head of Parliament count with a factor of 1.5. (e.g., 4 years as Minister = 6 weighted years) .

Sabbatical Requirement: Following tenure, a continuous 4-year sabbatical with zero immunity (legal, diplomatic, or international) and no state employment is mandatory.

Financial Settlement: The Agent is entitled to salary compensation until the end of the contract period (max 5 years).

**Strategic Justification:** Tenure increases the probability of corruption and dictatorship. This ensures no Agent hides behind immunity for decades.

**Accountable Entity:** National Government & Regional Authority.

**Audit Failure Criteria:** Refusal to resign or vacate immunity after the threshold is met.

**Remediation Protocols:** Termination of Employment and immediate cessation of immunity.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## 15.        **Require Regular Q&A with the Press**

**Standard Definition:** Management must provide live status reports and unrestricted Q&A with independent media.

**Operational Functionality & Specifications:** Monthly for high officials; quarterly for others. Sessions must be personal, live, and last 60-90 minutes. Media invitation lists in Doc 32.

**Strategic Justification:** Owners require frequent contact with management due to the high stakes of taxing, security, and environment. Unfiltered Q&A prevents information suppression.

**Accountable Entity:** All State-Related Organizations & Monopolies.

**Audit Failure Criteria:** Refusing critical news outlets or failing to hold the session personally.

**Remediation Protocols:** Termination of Employment for the head of the organization.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## Category 6: Systemic Transparency

### 16. Full Transparency of Public Orgs

**Standard Definition:** Owners have rights to all organizational data (contracts, payments, subsidiaries, etc.) via digital systems.

**Operational Functionality & Specifications:** Phased rollout: setup the system with current data within 1 year; provide all relevant 25-year historical data within 3 years. Documents must be scanned and queryable within 30 days. Excludes only deep military/intel. See Doc 32.

**Strategic Justification:** Transparency is the primary defense against fraud and unauthorized spending.

**Accountable Entity:** All State-Related Organizations.

**Audit Failure Criteria:** Sabotaging or slowing the setup of the Document Management System.

**Remediation Protocols:** Termination of Employment and a Type B2 25-year exclusion.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## 17. Public Economic & Social Data

**Standard Definition:** Interactive dashboard for audited stats on population, public debt, and wealth.

**Operational Functionality & Specifications:** Monthly updates required. Includes debt-per-owner and social indicators (e.g., child care, homelessness). Details in Doc 32.

**Strategic Justification:** Enables Owners to monitor organizational health and identify ineffective tax collection, social problems, or asset shifts.

**Accountable Entity:** National Government.

**Audit Failure Criteria:** Providing unverified, incomplete, or propaganda-based data.

**Remediation Protocols:** Immediate correction of service.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## 18.       Transparent Tax Impact Metric

**Standard Definition:** A single KPI (Metric) measuring the real work-hour impact of taxation.

**Operational Functionality & Specifications:** Measures hours an employee must work to afford one hour of their own professional services after all taxes (VAT, Corporate, Payroll). Model in Doc 32.

**Strategic Justification:** Simplifies complex tax codes to allow Owners and businesses to interpret real tax ratios.

**Accountable Entity:** National Government.

**Audit Failure Criteria:** Failure to provide the metric or sabotaging the procedure.

**Remediation Protocols:** Mandatory application of the right.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## 19. Prohibit Hidden Ownership in the Country

**Standard Definition:** Owners may veto business with organizations having hidden beneficial owners.

**Operational Functionality & Specifications:** Immediate termination of contracts with hidden-owner entities. Agents are prohibited from having hidden ownership in any country. Documents must be public within 14 days of a request.

**Strategic Justification:** Barrier to systemic corruption, which is far more expensive than regulatory costs.

**Accountable Entity:** All State-Related Organizations.

**Audit Failure Criteria:** Engaging with non-transparent entities.

**Remediation Protocols:** Termination of Employment and a Type B2 25-year exclusion.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## 20. Right to Challenge Organizational Identity

**Standard Definition:** Owners may publicly remind non-business orgs (NGOs, parties, religions) to align with stated values.

**Operational Functionality & Specifications:** Owners are protected from retaliation when calling out "false flags" or behavior-promotion discrepancies. Fabricated evidence remains actionable against the Owner.

**Strategic Justification:** Prevents the "hijacking" of votes via misleading adjectives (e.g., historical examples like the Nazi party).

**Accountable Entity:** All State-Related Orgs, NGOs, Political Parties.

**Audit Failure Criteria:** Retaliation, investigation, or repression of the Owner for critique.

**Remediation Protocols:** Termination of Employment for participating Agents.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## Category 7: Environmental Integrity

### 21. Public Pollution & Waste Data

**Standard Definition:** Regular, verified reports on air, water, and soil quality.

**Operational Functionality & Specifications:** Daily air/water reports required (e.g., toxic/radioactive particles, microplastics); quarterly reports on waste (produced, stored, recycled) and hazardous/nuclear materials. Includes 25 years of historical data and yearly audits.

**Strategic Justification:** Owners require continuous monitoring of industrial impacts on daily life to raise transparency.

**Accountable Entity:** Regional Authority & Local Government.

**Audit Failure Criteria:** Providing non-audited or manipulated data.

**Remediation Protocols:** Mandatory application of standards.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## **22. Prevent Deforestation and Protect Nature**

**Standard Definition:** Annual reports on total forest and water area.

**Operational Functionality & Specifications:** Includes proposals for 25% undisturbed land and a surface tax on roads/buildings. See Doc 32.

**Strategic Justification:** Prevents mass extinction by ensuring fair land usage for other species.

**Accountable Entity:** National Government & Regional Authority.

**Audit Failure Criteria:** Reporting failure or sabotaging requests.

**Remediation Protocols:** Mandatory application.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## 23. Open Access to Global Warming-related Data

**Standard Definition:** Daily regional environmental data published without propaganda.

**Operational Functionality & Specifications:** Reporting min/max temp, soil/water heat (at various depths), and ozone. Raw data required to avoid manipulation. See Doc 32.

**Strategic Justification:** Raising awareness through raw data helps Owners take personal mitigation actions.

**Accountable Entity:** National Government.

**Audit Failure Criteria:** Providing manipulated data or sabotaging requests.

**Remediation Protocols:** Mandatory application.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## **24. Tax Goods Based on Transport Distance**

**Standard Definition:** Owners have the protected right to publicly propose environmental taxes on goods based on distance.

**Operational Functionality & Specifications:** Tiers: 0% within the region; 1-5% for distances >500, 2000, 6000 miles. This serves as advocacy for economic sovereignty and supply chain resilience.

**Strategic Justification:** Incentivizes local production and rewards shorter, less vulnerable supply chains.

**Accountable Entity:** National Government.

**Audit Failure Criteria:** Sabotaging the Owner's right to advocate.

**Remediation Protocols:** Law change request to comply with the proposed framework.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## Category 8: Economic Risk Governance

### 25. Mandatory Insurance for High-Risk Industry

**Standard Definition:** Mass destruction potential activities must maintain insurance for rapid victim compensation.

**Operational Functionality & Specifications:** Mandatory for activities capable of killing 100+ in one incident or 1,000 within a month. Coverage must include 20 years' average salary per victim. List in Doc 32.

**Strategic Justification:** Ensures private fund payout rather than taxpayer reliance when organizations are unable or unwilling to pay.

**Accountable Entity:** National Government.

**Audit Failure Criteria:** Missing law or sabotaging requests.

**Remediation Protocols:** Mandatory application.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## 26. 26. Prevent the Abuse of Monopolies

**Standard Definition:** Strict regulation for orgs with >50% market share (20% in banking).

**Operational Functionality & Specifications:** Veto rights over monopoly management of common resources; split-ups allowed after 5 years. Rights include cost transparency and price monitoring. See Doc 32.

**Strategic Justification:** Prevents misuse of power and price manipulation regarding everyday resources.

**Accountable Entity:** National Government & Monopolies.

**Audit Failure Criteria:** Price manipulation or obstructing rival services.

**Remediation Protocols:** Mandatory transparency.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## **27. Veto the Early Reduction of Tariffs**

**Standard Definition:** Declared tariffs must remain for at least 365 days.

**Operational Functionality & Specifications:** Owners may ask for tariffs for specific trading partners based on partner behavior (e.g., slavery, war, lack of free speech). Tiers in Doc 32.

**Strategic Justification:** Rewards business continuity and a stable economic environment.

**Accountable Entity:** National Government.

**Audit Failure Criteria:** Early tariff reduction or sabotaging requests.

**Remediation Protocols:** Mandatory duration maintenance.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## 28. State Support for Foreign Loss Claims

**Standard Definition:** State must represent Owners in seeking foreign compensation for life, health, or property damage.

**Operational Functionality & Specifications:** 2-year payout limit (acknowledging 1-6 months for evidence gathering). Compensation: 30 years' avg. salary for life loss, paid to the nearest family member.

**Strategic Justification:** Forces the state to act as a debt collector for citizens in international industrial/military accidents.

**Accountable Entity:** National Government.

**Audit Failure Criteria:** Failure to represent interest or sabotaging the process.

**Remediation Protocols:** Termination of Employment for sabotaging Agents.

**Authorized Initiators & Filing Procedures:** Individual Owners for themselves or family members.

## 29. The Right to Personal Bankruptcy

**Standard Definition:** Owners have bankruptcy rights comparable to corporations.

**Operational Functionality & Specifications:** Mandated implementation within one year of a request.

**Strategic Justification:** Provides individuals the same protection from insolvency as "synthetic" juridical persons.

**Accountable Entity:** National Government.

**Audit Failure Criteria:** Delay in law implementation or sabotaging requests.

**Remediation Protocols:** Termination of Employment for the President/Cabinet.

**Authorized Initiators & Filing Procedures:** Individual Owners.

### 30. Taxation of AI Solutions

**Standard Definition:** Owners may request taxation on AI revenue to mitigate potential mass unemployment.

**Operational Functionality & Specifications:** 90% of revenue must be distributed evenly to all citizens. Requires full transparency and regular statistics.

**Strategic Justification:** Provides a safety net when AI solution TCO becomes far lower than human labor.

**Accountable Entity:** National Government.

**Audit Failure Criteria:** Failure to distribute funds or sabotaging requests.

**Remediation Protocols:** Enforcement of the special tax.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## Category 9: State Structure & Security

### 31. Enforce Standards for All Security and Law Enforcement

**Standard Definition:** Owners may deny the authority of personnel failing mandatory record, residency, and identification requirements.

#### **Operational Functionality & Specifications:**

Identification: Mandatory badge numbers, names, and departments; faces must be uncovered. Owners are authorized to record (photo/video) Agents.

Agent Profile: No legal name changes in the last 10 years.

Background: Must be a citizen and local resident continuously for the last 18 years. No major criminal record is permitted.

**Strategic Justification:** Owners must be able to identify Agents authorized to use force to prevent accountability-free misconduct. Residency ensures the Agent is a member of the community they serve. Refer to Doc 53.

**Accountable Entity:** National Government & Law Enforcement & Security.

**Audit Failure Criteria:** Personnel refusing identification or failing residency/record criteria.

**Remediation Protocols:** Termination of Employment for the Agent and supervisor.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## **32. Report Public Emergency Readiness**

**Standard Definition:** Annual readiness reports for emergencies, including resource capacity and reaction times.

### **Operational Functionality & Specifications:**

Nature: Wildfire, flood, earthquake, massive drought, heat wave, blizzard, hurricane, tornado, pandemic.

Industrial/Military: Accidents (chemical, biological, nuclear), fire, explosion, mining, transport, infrastructure (dam, bridge, tunnel), poisoning.

Shortages: Water, food, electricity, medical, shelter/homelessness.

Socio-Political: War, immigration, terrorist attacks.

Compliance: Yearly independent audit required.

**Strategic Justification:** Monitoring motivates management to reduce industrial risk and ensure readiness plans are actionable within one hour.

**Accountable Entity:** National Government & Local Government.

**Audit Failure Criteria:** Sabotaging requests or providing non-audited data.

**Remediation Protocols:** Termination of Employment for responsible Agents.

**Authorized Initiators & Filing Procedures:** Individual Owners.

### **33. No Detention Without Dangerous Conduct**

**Standard Definition:** No imprisonment for non-dangerous conduct or financial failure.

**Operational Functionality & Specifications:** Homelessness or insolvency are not criminal acts. Even unwillingness to pay is a case for debt-collectors, not imprisonment. Detention is only permitted for criminal force (theft, assault) or active danger.

**Strategic Justification:** Protects liberty from status-based jailing. If a company goes bankrupt without imprisonment, a single Owner has the same right.

**Accountable Entity:** National Government, Local Government, Law Enforcement.

**Audit Failure Criteria:** Detention without proof of criminal force.

**Remediation Protocols:** Denial of imprisonment; demand for law modification.

**Authorized Initiators & Filing Procedures:** Individual Owners acting for themselves or children.

### 34. Veto All Unjustified Surveillance

**Standard Definition:** Restricted data collection for non-suspects. Owners may veto mass surveillance.

**Operational Functionality & Specifications:** 90-day deletion rule for non-suspects. Prohibits profiling or foreign participation. Owners must be reported on captured data since when and by whom. Only citizens (min. 18 years old, born in country) may participate in surveillance. Refer to Doc 53.

**Strategic Justification:** No Agent may spy on the Principal (the Owner) without documented suspicion.

**Accountable Entity:** Law Enforcement & Security.

**Audit Failure Criteria:** Failure to comply with the 90-day deletion rule.

**Remediation Protocols:** Termination of Employment and a 4-year exclusion.

**Authorized Initiators & Filing Procedures:** Individual Owners.

### 35.       **Certify and Label Surveillance-Capable Goods**

**Standard Definition:** Certification and labeling of electronic goods for surveillance capacity (backdoors/remote shutdown).

**Operational Functionality & Specifications:** Requires physical On/Off switches. Labels: "Verified Free" vs "Possible Surveillance". Awareness raises societal problem visibility. See Doc 32.

**Strategic Justification:** Protects Owners from "backdoor" shutdowns of essential tools and unauthorized mass data collection.

**Accountable Entity:** National Government.

**Audit Failure Criteria:** Failure to label or certify goods.

**Remediation Protocols:** Termination of Employment and a 4-year exclusion.

**Authorized Initiators & Filing Procedures:** Individual Owners.

## 36. Veto Rights in Emergencies

**Standard Definition:** Right to terminate leaders ruling by decree beyond limits.

**Operational Functionality & Specifications:** Decree limits: 730 days for President/Head of Government; 1,095 days for cabinet members; 1,460 days for others. Post-limit requires a 4-year immunity-free sabbatical.

**Strategic Justification:** Prevents the exploitation or extension of crises to expand Agent power. Motivates management to resolve crises quickly.

**Accountable Entity:** National Government.

**Audit Failure Criteria:** Exceeding time limits for decree rule.

**Remediation Protocols:** Termination of Employment.

**Authorized Initiators & Filing Procedures:** Individual Owners.

### **37. Right to Name the State Form**

**Standard Definition:** Right to categorize the state's form using an Audit Checklist.

**Operational Functionality & Specifications:** Owners assess performance; Agents retaliating against the assessment are subject to removal. Criteria detailed in Doc 41 and Doc 32.

**Strategic Justification:** In a principal-agent relationship, the Principal assesses the Agent, not the reverse.

**Accountable Entity:** National Government.

**Audit Failure Criteria:** Retaliation, threats, or investigations against an Owner for their assessment.

**Remediation Protocols:** Termination of Employment without severance.

**Authorized Initiators & Filing Procedures:** Individual Owners.

### **38. Voter Approval for Border Changes**

**Standard Definition:** Annexation or separation must be authorized in advance by public vote.

**Operational Functionality & Specifications:** 365-day lead time required. Validation needs 2/3 YES vote and 50% participation. Owners may retrospectively nullify changes bypassing these mandates. See Doc 32.

**Strategic Justification:** Border changes (e.g., 1938-style annexations) often lead to catastrophic Owner risk.

**Accountable Entity:** National Government.

**Audit Failure Criteria:** Executing border changes without lead time or mandate.

**Remediation Protocols:** Termination of Employment and lifelong exclusion.

**Authorized Initiators & Filing Procedures:** Individual Owners.

### 39. Fair Pay to Prevent Corruption

**Standard Definition:** Owners may demand high Agent salaries to discourage corruption, within strict population-based limits.

**Operational Functionality & Specifications:** See Doc 32.

Baseline: Calculated as a factor of the Local Median Net Salary.

Factors: 8x-20x for President/Ministers; 4x-10x for MPs; 3x-5x for Mayors. Multiplied by a population factor (1x to 5x).

**Strategic Justification:** Well-paid state employees are a cornerstone in anti-corruption efforts (e.g., Singapore). High salaries help employ high-quality personnel for huge financial decisions.

**Accountable Entity:** All State-Related Organizations.

**Audit Failure Criteria:** Non-compliance with specified salary ranges.

**Remediation Protocols:** Mandatory application of salary ranges.

**Authorized Initiators & Filing Procedures:** Individual Owners.
