

(00) List of documents

The documentation is structured in layers — each document takes you one level deeper into the solution, making it easier and faster to understand.

How to get the most out of this documentation?

- **Intro:** Read all four documents. They are short, easy to read, and essential for understanding the core concept.
- **The Framework:** Use it like a reference manual: look up the rights you need and then read those sections in more depth. Ideally, you should have a basic overview of the first 13 rights (out of 39).
- **Terms of Use, Copyright, Disclaimer:** Please read these before applying the solution in practice.

Intro
