

(31) The Citizens' (Owners') Rights Framework

Operational Note: Users must strictly review the Disclaimer (Document 53) regarding operational risk assessments and liability limitations prior to deployment. The User assumes full responsibility for assessing the safety of the operational environment.

Each Right defines a governance relationship between the individual Owner (the Citizen) and the primary accountable entity listed; the scope of these categories is detailed in the table below:

Category	Definition / Scope	International Equivalent
National Government	The central executive, legislative, and sovereign bodies of a country	State, Federation, Country.
Regional Authority	Intermediate governance levels responsible for specific territories or states within a country	Province, Canton, Land, County.
Local Government	Governance at the most immediate level of residence	Town, City, Village, Municipality.
Law Enforcement & Security	Agencies authorized to use force or conduct surveillance	Police, Military, Intelligence, Private Security.
Public Service Providers	Entities managing infrastructure, basic needs, or essential services	Waterworks, Energy Providers, IRS, Schools.
Monopolies	Entities (state or private) holding over 50% market share in essential sectors	Utility Monopolies, Dominant Banks.
Non-Business Entities	Organizations that influence public life but are not primary service providers	NGOs, Political Parties, Religious Institutions.
Business Entities	Business Entities	Business Entities
All State-Related Organizations	A "Catch-all" term for any entity funded by or acting on behalf of the Owners	Public Sector, The State.

Category 1: Foundational Governance

1. Treat Every Citizen as an Owner

Standard Definition: Citizens hold the primary ownership stake in all state-related organizations. Employees and elected officials are subordinates who must treat every non-violent Owner with professional respect. An Owner's right to offer criticism or express an opinion is structurally superior to the sensibilities of any state organization or employee.

Operational Functionality & Specifications: No Owner may be subjected to suppression, threats, unauthorized investigation, or administrative penalties for non-violent questioning, vocalizing criticism, or requesting documentation. Prohibited Agent conduct includes, but is not limited to: detention, abuse, threats with weapons or force, loss of employment, citizenship revocation, removal of children, psychiatric commitment, or placement under guardianship. These obligations apply to all state-related entities (parliament, military, intelligence) and third-party contractors.

Strategic Justification: This right resolves the problem of "Ownership Denial". In any professional organization, an Agent cannot deny the Principal's status. This ensures the sensibilities of subordinates (e.g., law enforcement) do not override the Owner's inherent authority to critique the organization.

Accountable Entity: All State-Related Organizations.

Audit Failure Criteria: Any instance where an Owner is punished, tracked, or ridiculed for expressing a non-violent opinion or Sabotaging requests.

Remediation Protocols: Immediate cessation of the violation. Personnel face Type B1 Mandate Nullification (Termination of Employment) and a Type B2 Public Service Exclusion (10-year ban). Administrative action must attach to at least three individuals: the primary actor, their supervisor, and the department head.

Authorized Initiators & Filing Procedures: Individual Owners acting for themselves or their children. Refer to Document 40.

2. Right to Non-Violent Speech

Standard Definition: Owners have the inherent right to express opinions or criticism through verbal, written, or digital channels, whether individually or in groups. No state employee or organization may suppress, monitor, or penalize an Owner for exercising non-violent expression.

Operational Functionality & Specifications: This right covers all digital and paper communication and public demonstrations, whether conducted individually or in groups. Agents (including elected officials) must accept non-violent criticism as a mandatory condition of their employment. Non-violent speech may not be suppressed, monitored, or punished.

Strategic Justification: The formulation of divergent views is an essential component of ownership. This right is structurally superior to any organizational "reputation management" or the personal sensibilities of Agents.

Accountable Entity: All State-Related Organizations.

Audit Failure Criteria: Suppression, threats (e.g., job loss, psychiatric commitment), or investigations against an Owner for speech or Sabotaging requests.

Remediation Protocols: Immediate Termination of Employment for Agents or contract termination for subcontractors, followed by a Type B2 10-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners acting for themselves or their children. Refer to Document 40.

3. Open Access to All Laws

Standard Definition: Compliance cannot be expected if the rules are inaccessible. All current and proposed laws, decrees, and regulations must be available for free in unrestricted, downloadable, and digital formats. If these standards are not met, an Owner may deny the validity or application of the rule.

Operational Functionality & Specifications: Digital access must be searchable, registration-free, provided in unchangeable common formats, and allow for "Data Time Travel" to audit past versions. Physical copies are required in every town exceeding 1,000 inhabitants. Phased deadlines apply: current laws must be available within 1 month; a 5-year history within 6 months; and a 25-year history within 12 months of the first request. Changes must be accessible 90 days in advance (7 days in emergencies).

Strategic Justification: Owners can only follow rules they can access. Centralized, free access reduces the cost of compliance for Owners and businesses.

Accountable Entity: National Government & Regional Authority & Local Government.

Audit Failure Criteria: Bypassing the 90-day rule or providing non-searchable/restricted data or Sabotaging requests.

Remediation Protocols: Postponement of the law's enforcement date. In case of Sabotaging requests: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

Category 2: Vital Protections

4. Protect Lives from Immediate Threats

Standard Definition: The primary function of the state is the physical protection of its Owners. Organizations must maintain operational readiness for natural disasters, industrial accidents, and pandemics while ensuring functioning emergency services.

Operational Functionality & Specifications: Owners may demand evidence of readiness for local natural and industrial disasters, including medical stockpiles, water, food, and functional emergency networks (Police, Ambulance, Hospitals). The state must avoid starting wars on foreign soil that result in casualties.

Strategic Justification: Physical survival is the core objective of the state-owner contract. Readiness for rapid-onset threats (e.g., tornadoes or industrial accidents) is a non-negotiable service level.

Accountable Entity: National Government & Regional Authority & Local Government.

Audit Failure Criteria: Negligent or intentional failure to provide readiness or starting unauthorized foreign wars or Sabotaging requests

Remediation Protocols: Termination of Employment. If negligent: 5-year ban; if intentional: lifetime ban.

Authorized Initiators & Filing Procedures: Individual Owners acting for themselves or their children. Refer to Document 40.

5. Defense Against Systemic State Overreach

Standard Definition: An Owner possesses an absolute, non-negotiable right to immediately veto any action by state Organizations or their Agents that threatens Owner groups' life, health, freedom of movement, or assets based on identity, status, or non-violent activity.

Standardized Indicators of Systemic Misconduct (Persecution Criteria):

- **Demographic Identification:** Targeting based on ethnicity, religion, or sexual orientation (e.g., historical systemic purges or genocides).
- **Socioeconomic Status & Professional Classification:** Persecution directed at specific social groups, including Owners experiencing homelessness or those within specific professional categories.
- **Belief Systems & Political Affiliation:** Retaliation based on an Owner's political views or philosophical convictions.
- **Exercise of Ownership Rights:** Suppression of fundamental non-violent activities, including free speech, public demonstrations, or industrial strikes.

Operational Functionality & Specifications: This standard prevents the Organization from utilizing "legal" mechanisms to persecute Owners.

Strategic Justification: History demonstrates that legal structures can be subverted to validate the destruction of specific demographics (e.g., 20th-century totalitarianism). This right ensures the Principal's authority remains intact, even if the Agent modifies internal statutes to authorize misconduct.

Accountable Entity: National Government & Law Enforcement.

Audit Failure Criteria:

Direct: Murder, execution, unauthorized detention, jailing, kidnapping, placement in camps, torture, or the forcible removal of an Owner's children.

Indirect: Systematic censorship or silencing of information regarding imminent catastrophic events (e.g., industrial or military accidents, pandemics) to hide organizational failure.

Or Sabotaging requests

Remediation Protocols: Immediate cessation of the unauthorized action. Involved personnel—from decision-makers to processors—face mandatory Type B1 Mandate Nullification (Termination of Employment) and a Type B2 Public Service Exclusion (20-year ban). "Following orders" is not a valid defense.

Authorized Initiators & Filing Procedures: Individual Owners acting for themselves, their children, or on behalf of Owners who are missing or incapacitated. Refer to Document 40.

6. Guaranteed Basic Need

Standard Definition: A country's core mandate is to ensure the survival of its Owners. This includes daily access to water, food, shelter, and emergency medical care, as well as weekly access to energy and communication services. Standards must meet or exceed the quality of care provided to refugees or prisoners.

Operational Functionality & Specifications: Services must be provided for free if the Owner lacks wealth. Quality must exceed that of refugees or prisoners. Services must be local for 6 months, then within 200 miles of the Owner's address.

Strategic Justification: Keeping Owners alive is the fundamental meaning of a country.

Accountable Entity: National Government.

Audit Failure Criteria: Sabotaging requests.

Remediation Protocols: Termination of Employment and a Type B2 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners acting for themselves or their children. Refer to Document 40.

Category 3: Citizenship & Migration Control

7. Protection of Citizenship Status

Standard Definition: An Owner has the right to veto the involuntary withdrawal of their citizenship, especially if they hold single citizenship or acquired it at birth. Relinquishing citizenship must be a strictly voluntary act performed without organizational pressure.

Operational Functionality & Specifications: A 1-year notice is required for withdrawal from non-birthright citizens. No Owner can be forced to renounce other citizenships.

Strategic Justification: Agents (employees) cannot terminate the status of the Principal (the Owner).

Accountable Entity: National Government.

Audit Failure Criteria: Sabotaging requests.

Remediation Protocols: Termination of Employment, Type B2 10-year exclusion, and Type C Financial Restitution (min. 10x average salary).

Authorized Initiators & Filing Procedures: Individual Owners acting for themselves or their children or parents. Refer to Document 40.

8. Publish All Immigration Statistics

Standard Definition: Owners are entitled to regular, free, and independently audited statistics regarding immigration volumes, refugee status, and new citizenships. Data must include geographic distribution to ensure transparency in demographic shifts.

Operational Functionality & Specifications: Reports must be monthly, unchangeable, and contain 8 years of historical data. Data must include anonymized geodata (ZIP codes) for entries and address locations, grouped by citizenship, sex, and age. Accuracy must be confirmed by two independent consulting firms.

Strategic Justification: Transparency enables Owners to track demographic shifts and articulate informed criticism.

Accountable Entity: National Government & Regional Authority.

Audit Failure Criteria: Sabotaging requests.

Remediation Protocols: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

9. Set Voting Rules for New Citizens

Standard Definition: To preserve the integrity of the existing ownership structure, voting rights for new citizens (acquired after age one) may be restricted for a 10-year period. This limitation ensures that long-term organizational stability is prioritized.

Operational Functionality & Specifications: Restriction applies to voting and state-related leadership eligibility. Monthly audited reports with ZIP geodata must track the application of this ban.

Strategic Justification: Prevents the ruling power from artificially expanding the voter base (e.g., through annexation) to maintain power. This mirrors the 18-year wait for natural-born citizens.

Accountable Entity: National Government.

Audit Failure Criteria: Sabotaging requests.

Remediation Protocols: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

10. Voter Approval of Visa Rules

Standard Definition: The specific conditions for granting visas and new citizenships must be authorized in advance by the Owners through a public mandate. Management may not alter these criteria without explicit Owner approval.

Operational Functionality & Specifications: In the absence of an authorized mandate, new visas or citizenships must be suspended. This protects Owners from economic displacement caused by unauthorized changes.

Strategic Justification: Owners must control the terms of membership to ensure their interests are not ignored by management.

Accountable Entity: National Government.

Audit Failure Criteria: Sabotaging requests

Remediation Protocols: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

Category 4: Mandate Authorization

11. Voter Approval for Constitution

Standard Definition: As the cornerstone of all organizational rules, any change to the constitution must be authorized in advance by the Owners via public voting. Unauthorized changes are considered null and void.

Operational Functionality & Specifications: Changes must be public 270 days in advance. Validation requires a YES vote from 50% of all Owners. Owners may retrospectively nullify any change bypassing these limits.

Strategic Justification: The constitution is the cornerstone of all laws and must be stable. This prevents political factions from stripping rights or changing state forms overnight.

Accountable Entity: National Government.

Audit Failure Criteria: Bypassing the notice period or the 50% threshold or Modifying constitution without a prior public mandate(=voting) or sabotaging requests.

Remediation Protocols: Termination of Employment for the Management without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

12. Veto of Programs Outside the Mandate

Standard Definition: Elected employees and management are authorized to implement only the specific programs presented in their official election mandate. Owners may veto any unauthorized investment or policy that was not part of the approved program.

Operational Functionality & Specifications: Election programs must be public 100 days before the vote. Projects exceeding budget by 25% or omitted from the mandate may be halted by any Owner. Quarterly reporting on authorized investments is required.

Strategic Justification: Prevents "mission creep" and unauthorized spending. Management is only mandated for what they have explicitly written down.

Accountable Entity: All State-Related Organizations & Other Organizations

Audit Failure Criteria: Executing unauthorized investments or stopping authorized services or sabotaging requests.

Remediation Protocols: Termination of Employment for the head of the organization/management without severance and a 4-year exclusion..

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

13. Enforce High Standards for Voting

Standard Definition: Owners may deny the results of any public vote that fails to meet strict Quality Assurance (QA) standards. This includes independent audits, verified counting processes, and a risk-limiting audit with a defined confidence level.

Operational Functionality & Specifications: Requires a nationwide risk-limiting audit ($\alpha=0.01$) by three independent firms per circle. Random sampling of 20% of the most contested circles is required; discrepancies $>2\%$ trigger a full recount. See technical specs in Doc 32.

Strategic Justification: Voting fraud has historically hijacked the will of Owners. Transparent QA is essential to minimize manipulation risks.

Accountable Entity: National Government & Regional Authority.

Audit Failure Criteria: Failure to perform the audit or exceeding discrepancy limits or sabotaging requests.

Remediation Protocols: Nullification of results. For sabotage: Termination of Employment and a Type B2 25-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

Category 5: Executive Accountability

14. Limit Terms and Immunity for Leaders

Standard Definition: Leadership in state organizations is time-limited to prevent systemic corruption. Once the term limit is reached, individuals must serve a continuous four-year period without any legal immunity to ensure they remain accountable for their tenure.

Operational Functionality & Specifications:

The 20-Year Threshold: Owners may request Termination of Employment for any individual holding immunity for 20 weighted years without a continuous 4-year immunity-free break.

Weighted Seniority: Years as President, Minister, or Head of Parliament count with a factor of 1.5. (e.g., 4 years as Minister = 6 weighted years).

Sabbatical Requirement: Following tenure, a continuous 4-year sabbatical with zero immunity (legal, diplomatic, or international) and no state employment is mandatory.

Financial Settlement: The Agent is entitled to salary compensation until the end of the contract period (max 5 years).

Strategic Justification: Tenure increases the probability of corruption and dictatorship. This ensures no Agent hides behind immunity for decades.

Accountable Entity: National Government & Regional Authority.

Audit Failure Criteria: Refusal to resign or vacate immunity after the threshold is met or sabotaging requests.

Remediation Protocols: Termination of Employment without severance and immediate cessation of immunity and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

15. Require Regular Q&A with the Press

Standard Definition: Management is obligated to provide live, personal status reports to the Owners, followed by an unrestricted Q&A session with independent media. This ensures that information is not filtered or suppressed by the organization's public relations departments.

Operational Functionality & Specifications: Monthly for high officials; quarterly for others. Sessions must be personal, live, and last 60-90 minutes. Media invitation lists in Doc 32.

Strategic Justification: Owners require frequent contact with management due to the high stakes of taxing, security, and environment. Unfiltered Q&A prevents information suppression.

Accountable Entity: All State-Related Organizations & Monopolies.

Audit Failure Criteria: Refusing critical news outlets or failing to hold the session personally or sabotaging requests.

Remediation Protocols: Termination of Employment for the head of the organization without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

Category 6: Systemic Transparency

16. Full Transparency of Public Orgs

Standard Definition: Owners have the right to comprehensive data regarding all organizational activities, including contracts, payments, project costs, and subsidiaries. Information must be accessible through a digital document management system without fees or registration.

Operational Functionality & Specifications: Phased rollout: setup the system with current data within 1 year; provide all relevant 25-year historical data within 3 years. Documents must be scanned and queryable within 30 days. Excludes only deep military/intel. See Doc 32.

Strategic Justification: Transparency is the primary defense against fraud and unauthorized spending.

Accountable Entity: All State-Related Organizations.

Audit Failure Criteria: Sabotaging or slowing the setup of the Document Management System or sabotaging requests.

Remediation Protocols: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

17. Public Economic & Social Data

Standard Definition: The organization must provide a free, interactive dashboard displaying audited statistics on population, public debt, employment, and wealth. This allows Owners to monitor the efficiency and fiscal health of their organization.

Operational Functionality & Specifications: Monthly updates required. Includes debt-per-owner and social indicators (e.g., child care, homelessness). Details in Doc 32.

Strategic Justification: Enables Owners to monitor organizational health and identify ineffective tax collection, social problems, or asset shifts.

Accountable Entity: National Government & Regional Authority.

Audit Failure Criteria: Providing data not in the required form or not providing data in time metric or sabotaging requests.

Remediation Protocols: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

18. Transparent Tax Impact Metric

Standard Definition: The objective is to provide Owners with a single, audited figure that represents the true work-hour cost of the state's fiscal policy. By converting abstract percentages into a "work-hour ratio," Owners can immediately interpret the efficiency of tax collection and the real value of their labor within the current governance framework.

Operational Functionality & Specifications: The organization is mandated to provide this calculation for the median income. While the Owner is not required to perform the calculation, the state must disclose the full data set to allow for independent verification of correctness.

Measures hours an employee must work to afford one hour of their own professional services after all taxes (VAT, Corporate, Payroll). Model in Doc 32.

Strategic Justification: Simplifies complex tax codes to allow Owners and businesses to interpret real tax ratios.

Accountable Entity: National Government & & Regional Authority.

Audit Failure Criteria: Failure to provide the metric or sabotaging the procedure.

Remediation Protocols: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

19. Prohibit Hidden Ownership in the Country

Standard Definition: Owners may veto any business activity or contract involving organizations with hidden or unknown ownership. Transparency regarding ultimate beneficial owners is a prerequisite for organizational engagement.

Operational Functionality & Specifications: Immediate termination of contracts with hidden-owner entities. Agents are prohibited from having hidden ownership in any country. Documents must be public within 90 days of a request.

Strategic Justification: Barrier to systemic corruption, which is far more expensive than regulatory costs.

Accountable Entity: All State-Related Organizations.

Audit Failure Criteria: Engaging with non-transparent entities.

Remediation Protocols: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

20. Right to Challenge Organizational Identity

Standard Definition: Owners may publicly remind non-business organizations (including NGOs and religious institutions) to align their conduct with their stated values. This ensures that organizations do not utilize "false flags" or misleading adjectives to manipulate public perception.

Operational Functionality & Specifications: Owners are protected from retaliation when calling out "false flags" or behavior-promotion discrepancies. Fabricated evidence remains actionable against the Owner.

Strategic Justification: Prevents the "hijacking" of votes via misleading adjectives (e.g., historical examples like the Nazi party).

Accountable Entity: All State-Related Organizations & Non-Business Entities & Political Parties

Audit Failure Criteria: Retaliation, investigation, or repression of the Owner for critique.

Remediation Protocols: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

Category 7: Environmental Integrity

21. Public Pollution & Waste Data

Standard Definition: Management must provide regular, independently verified reports on air, water, and soil quality. This includes detailed data on waste management, recycling rates, and hazardous materials.

Operational Functionality & Specifications: Daily air/water reports required (e.g., toxic/radioactive particles, microplastics); quarterly reports on waste (produced, stored, recycled) and hazardous/nuclear materials. Includes 25 years of historical data and yearly audits.

Strategic Justification: Owners require continuous monitoring of industrial impacts on daily life to raise transparency.

Accountable Entity: Regional Authority & Regional Authority.

Audit Failure Criteria: Providing manipulated data or not providing data as required or sabotaging requests.

Remediation Protocols: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

22. Prevent Deforestation and Protect Nature

Standard Definition: Owners have the right to demand annual reports on the total area dedicated to forests and water bodies. This facilitates the monitoring of land use and the preservation of undisturbed areas for flora and fauna.

Operational Functionality & Specifications: Includes proposals for 25% undisturbed land and a surface tax on roads/buildings. See Doc 32.

Strategic Justification: Prevents mass extinction by ensuring fair land usage for other species.

Accountable Entity: National Government & Regional Authority & Local Government.

Audit Failure Criteria: Providing manipulated data or not providing data as required or sabotaging requests.

Remediation Protocols: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

23. Open Access to Global Warming-related Data

Standard Definition: Daily regional temperature and environmental data must be published without manipulation or propaganda. Historical data must be preserved in unchangeable formats to prevent retrospective data alterations.

Operational Functionality & Specifications: Reporting min/max temp, soil/water heat (at various depths), and ozone. Raw data required to avoid manipulation. See Doc 32.

Strategic Justification: Raising awareness through raw data helps Owners take personal mitigation actions.

Accountable Entity: National Government & Regional Authority & Local Government.

Audit Failure Criteria: Providing manipulated data or not providing data as required or sabotaging requests.

Remediation Protocols: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

24. Tax Goods Based on Transport Distance

Standard Definition: Owners may ask for environmental taxes on goods based on the distance they have been transported. This rewards local production and encourages efficient supply chains to reduce environmental impact.

Operational Functionality & Specifications: Tiers: 0% within the region; 1-5% for distances >500, 2000, 6000 miles. This serves as advocacy for economic sovereignty and supply chain resilience.

Strategic Justification: Incentivizes local production and rewards shorter, less vulnerable supply chains.

Accountable Entity: National Government.

Audit Failure Criteria: Sabotaging the Owner's right to advocate.

Remediation Protocols: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

Category 8: Economic Risk Governance

25. Mandatory Insurance for High-Risk Industry

Standard Definition Any business or state activity with mass destruction potential (e.g., nuclear, chemical, large-scale infrastructure) must maintain mandatory insurance. This ensures that victims can be compensated rapidly without relying on the state's budget.

Operational Functionality & Specifications: Mandatory for activities capable of killing 100+ in one incident or 1,000 within a month. Coverage must include 20 years' average salary per victim. List in Doc 32.

Strategic Justification: Ensures private fund payout rather than taxpayer reliance when organizations are unable or unwilling to pay.

Accountable Entity: National Government.

Audit Failure Criteria: Sabotaging requests.

Remediation Protocols: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

26. Prevent the Abuse of Monopolies

Standard Definition: Owners may demand strict regulations and transparency for any organization holding more than a 50% market share (or 20% in banking). This prevents the misuse of common resources and protects against unjustified pricing.

Operational Functionality & Specifications: Veto rights over monopoly management of common resources; split-ups allowed after 5 years. Rights include cost transparency and price monitoring. See Doc 32.

Strategic Justification: Prevents misuse of power and price manipulation regarding everyday resources.

Accountable Entity: National Government & Monopolies.

Audit Failure Criteria: Price manipulation or obstructing rival services or not providing all data and.

Remediation Protocols: Mandatory transparency.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

27. Veto the Early Reduction of Tariffs

Standard Definition: While Owners can ask for tariffs, they hold a specific veto right to ensure that once a tariff is justified, it remains in place for at least 365 days. This prevents management from using trade barriers as temporary political leverage.

Operational Functionality & Specifications: Owners may ask for tariffs for specific trading partners based on partner behavior (e.g., slavery, war, lack of free speech). Tiers in Doc 32.

Strategic Justification: Rewards business continuity and a stable economic environment.

Accountable Entity: National Government.

Audit Failure Criteria: Sabotaging requests.

Remediation Protocols: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

28. State Support for Foreign Loss Claims

Standard Definition: Claims If a foreign entity causes damage to an Owner on national territory, the state is obligated to represent the Owner in seeking compensation. These are treated as cross-border insurance cases with a focus on restitution for life and property.

Operational Functionality & Specifications: 2-year payout limit (acknowledging 1-6 months for evidence gathering). Compensation: 30 years' avg. salary for life loss, paid to the nearest family member.

Strategic Justification: Forces the state to act as a debt collector for citizens in international industrial/military accidents.

Accountable Entity: National Government.

Audit Failure Criteria: Failure to represent interest or sabotaging any requests.

Remediation Protocols: In case of sabotaging any request Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners for themselves or family members. Refer to Document 40.

29. The Right to Personal Bankruptcy

Standard Definition: Owners have the right to file for personal bankruptcy under conditions comparable to those afforded to corporations or countries. If these laws do not exist, the state is mandated to design and implement them within one year.

Operational Functionality & Specifications: Mandated implementation within two years of a request.

Strategic Justification: Provides individuals the same protection from insolvency as "synthetic" juridical persons.

Accountable Entity: National Government.

Audit Failure Criteria: Delay in law implementation or sabotaging requests.

Remediation Protocols: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

30. Taxation of AI Solutions

Standard Definition: To mitigate the risk of mass unemployment caused by artificial intelligence, Owners have the right to request taxation on AI-related revenue. At least 90% of this tax income must be distributed evenly among all citizens.

Operational Functionality & Specifications: 90% of the amount of taxation must be distributed evenly to all citizens. Requires full transparency and regular statistics.

Strategic Justification: Provides a safety net when AI solution TCO becomes far lower than human labor.

Accountable Entity: National Government.

Audit Failure Criteria: Sabotaging requests.

Remediation Protocols: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

Category 9: State Structure & Security

31. Enforce Standards for All Security and Law Enforcement

Standard Definition: Owners may deny the authority of any security or police personnel who do not meet minimum requirements, such as a clean criminal record, local residency, and mandatory identification.

Operational Functionality & Specifications:

Identification: Mandatory badge numbers, names, and departments; faces must be uncovered. Owners are authorized to record (photo/video) Agents.

Agent Profile: No legal name changes in the last 10 years.

Background: Must be a citizen and local resident continuously for the last 18 years. No major criminal record is permitted.

Strategic Justification: Owners must be able to identify Agents authorized to use force to prevent accountability-free misconduct. Residency ensures the Agent is a member of the community they serve. Refer to Doc 53.

Accountable Entity: National Government & Regional Authority & Local Government & Law Enforcement & Security.

Audit Failure Criteria: Personnel refusing identification or failing residency/record criteria.

Remediation Protocols: Termination of Employment for the Agent and supervisor without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

32. Report Public Emergency Readiness

Standard Definition: The state must publish annual reports regarding its readiness for emergencies, including resource capacity and reaction times for natural disasters, industrial accidents, and infrastructure failures.

Operational Functionality & Specifications:

Nature: Wildfire, flood, earthquake, massive drought, heat wave, blizzard, hurricane, tornado, pandemic.

Industrial/Military: Accidents (chemical, biological, nuclear), fire, explosion, mining, transport, infrastructure (dam, bridge, tunnel), poisoning.

Shortages: Water, food, electricity, medical, shelter/homelessness.

Socio-Political: War, immigration, terrorist attacks.

Compliance: Yearly independent audit required.

Strategic Justification: Monitoring motivates management to reduce industrial risk and ensure readiness plans are actionable within one hour.

Accountable Entity: National Government & Regional Authority & Local Government

Audit Failure Criteria: Sabotaging requests or not providing data or providing non-audited data.

Remediation Protocols: Termination of Employment with severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

33. No Detention Without Dangerous Conduct

Standard Definition: An Owner may not be imprisoned or detained if their conduct did not involve criminal force and poses no danger to others. For example, the inability to pay a fine is a financial failure, not a criminal act. The request is not binding to the organization.

Operational Functionality & Specifications: Homelessness or insolvency are not criminal acts. Even unwillingness to pay is a case for debt-collectors, not imprisonment. Detention is only permitted for criminal force (theft, assault) or active danger.

Strategic Justification: Protects liberty from status-based jailing. If a company goes bankrupt without imprisonment, a single Owner has the same right.

Accountable Entity: National Government & Regional Authority & Local Government & Law Enforcement

Audit Failure Criteria: Sabotaging requests.

Remediation Protocols: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual. Refer to Document 40.

34. Veto All Unjustified Surveillance

Standard Definition: Data collection and storage for Owners who are not suspected of a crime is restricted. Owners may veto mass surveillance and demand transparency regarding what data has been captured and stored.

Operational Functionality & Specifications: 90-day deletion rule for non-suspects. Prohibits profiling or foreign participation. Owners must be reported on captured data since when and by whom. Only citizens (min. 18 years old, born in country) may participate in surveillance. Refer to Doc 53.

Strategic Justification: No Agent may spy on the Principal (the Owner) without documented suspicion.

Accountable Entity: National Government & Regional Authority & Local Government & Law Enforcement & Security Organizations & Business Entities & Non-Business Entities.

Audit Failure Criteria: Sabotaging requests or failure to comply with the 90-day deletion rule.

Remediation Protocols: Termination of Employment and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

35. Certify and Label Surveillance-Capable Goods

Standard Definition: All electronic devices and software must be certified and labeled regarding their capacity for surveillance or manipulation. Owners have the right to know if a product contains "backdoors" or remote shutdown features.

Operational Functionality & Specifications: Requires physical On/Off switches. Labels: "Verified Free" vs "Possible Surveillance". Awareness raises societal problem visibility. See Doc 32.

Strategic Justification: Protects Owners from "backdoor" shutdowns of essential tools and unauthorized mass data collection.

Accountable Entity: National Government.

Audit Failure Criteria: Sabotaging requests.

Remediation Protocols: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

36. Veto Rights in Emergencies

Standard Definition: Management frequently exploits crises to expand power. Owners hold the right to demand the termination of leaders who rule by decree beyond specified time limits without accountability.

Operational Functionality & Specifications: Decree limits: 730 days for President/Head of Government; 1,095 days for cabinet members; 1,460 days for others. Post-limit requires a 4-year immunity-free sabbatical.

Strategic Justification: Prevents the exploitation or extension of crises to expand Agent power. Motivates management to resolve crises quickly.

Accountable Entity: National Government.

Audit Failure Criteria: Sabotaging requests or exceeding time limits for decree rule.

Remediation Protocols: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

37. Right to Name the State Form

Standard Definition: Owners have the right to assess and categorize the state's form (e.g., Democracy, Dictatorship, Fascist) based on objective indicators without facing retaliation. It is the Owner who evaluates the organization, not the reverse.

Operational Functionality & Specifications: Owners assess performance; Agents retaliating against the assessment are subject to removal. Criteria detailed in Doc 41.

Strategic Justification: In a principal-agent relationship, the Principal assesses the Agent, not the reverse.

Accountable Entity: National Government.

Audit Failure Criteria: Sabotaging requests or retaliation, threats, or investigations against an Owner for their assessment.

Remediation Protocols: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

38. Voter Approval for Border Changes

Standard Definition: Any annexation or separation of territory must be authorized in advance by a public vote. Such changes cannot take effect without a mandate secured at least one year prior to the action.

Operational Functionality & Specifications: 365-day lead time required. Validation needs 2/3 YES vote and 50% participation. Owners may retrospectively nullify changes bypassing these mandates. See Doc 32.

Strategic Justification: Border changes (e.g., 1938-style annexations) often lead to catastrophic Owner risk.

Accountable Entity: National Government.

Audit Failure Criteria (any): Sabotaging requests or executing border changes without lead time or without mandate.

Remediation Protocols: Termination of Employment without severance and lifetime ban.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.

39. Fair Pay to Prevent Corruption

Standard Definition: Owners may demand that employees in high-stakes positions receive salaries that are high enough to effectively discourage corruption but remain within specific, population-based limits.

Operational Functionality & Specifications: See Doc 32.

Strategic Justification: Well-paid state employees are a cornerstone in anti-corruption efforts (e.g., Singapore). High salaries help employ high-quality personnel for huge financial decisions.

Accountable Entity: All State-Related Organizations.

Audit Failure Criteria: Sabotaging requests.

Remediation Protocols: Termination of Employment without severance and a 4-year exclusion.

Authorized Initiators & Filing Procedures: Individual Owners. Refer to Document 40.
